

July
25

Sutton Lower school; consequently
a very small attendance, especially
in the afternoon.
The Rev. F. G. Mogan called in
this morning.

Found it impossible to get on
with work, while the attendance
is so very poor.

26 Attendance again very poor to day,
especially in the afternoon,
only 24 present, cannot work well
with so few children.

29 Found little Annie Troffat was
sick of diphtheria.

30 The Rev. F. G. Mogan called
this morning.

July: 1. The attendance this week has been
slightly better; many children
are still away in the hay,
& many fear of diphtheria
since the illness of Annie
Troffat. And it is impossible
to get 'em well with work with
so small an attendance.

2 The Rev. F. G. Mogan called.

3 Attendance dropping again towards
the end of the week on account of
three being sick of diphtheria
in the village.

Took copy book writing in place
of the Lessons stated on Line
Table there being a small attendance
this afternoon.
