

Sept.

6 Fear of further spreading of
fever & diphtheria, many parents
still refuse to send their children
for fear of infection

4 Fellows very poorly left Ethel
Shaffer most of the day,
but called reports myself.

8 A fearfully wet morning
only 24 present this morning
on that account, 50 present on
the previous day, only 20 present
this afternoon.

Took copy books the first lesson
this afternoon.

The "School Treat" is arranged for
Friday afternoon August 10th.

Find it impossible to work well
with so poor an attendance.

10 The School Treat took place this
afternoon; the children had a
holiday this morning but the
room might be prepared.

13 "General & Family Leads" 24 present.
The Rev. F. G. Morgan called & said
that no children from Olden Park
& Plautin Hill should attend the
school until fever & diphtheria
had abated in that neighbourhood.

21 present in the afternoon; several
of them asked to leave at 3-30 to go
to the "Wakes".
